

CHWG UPGRADES

Homepage logo animation,

Essentially, it's going to be an updated logo, small logo animation so when you scroll down the logo gets rotated 45 degrees. Something along the lines of what we have done, nothing complicated.

Mission Page; Animated Numbers,

On the mission page, the 2 numbers statistics representing homeopathy, an idea is to make them automated so when the user enters the page the numbers are presented in an automated fashion.

Email Verification Process (confirm your account).

Upon logging in, the user gets directed to 'Confirm Your Email Page' where they have to access their email and validate their user id.

Additional 15-30 UI Customized mini UI guiding notification/prompts.

This is building upon what we have currently done with more user guiding ui strips. He has created examples of what he wants.

Upgrade/ highly customize the calendar feature.

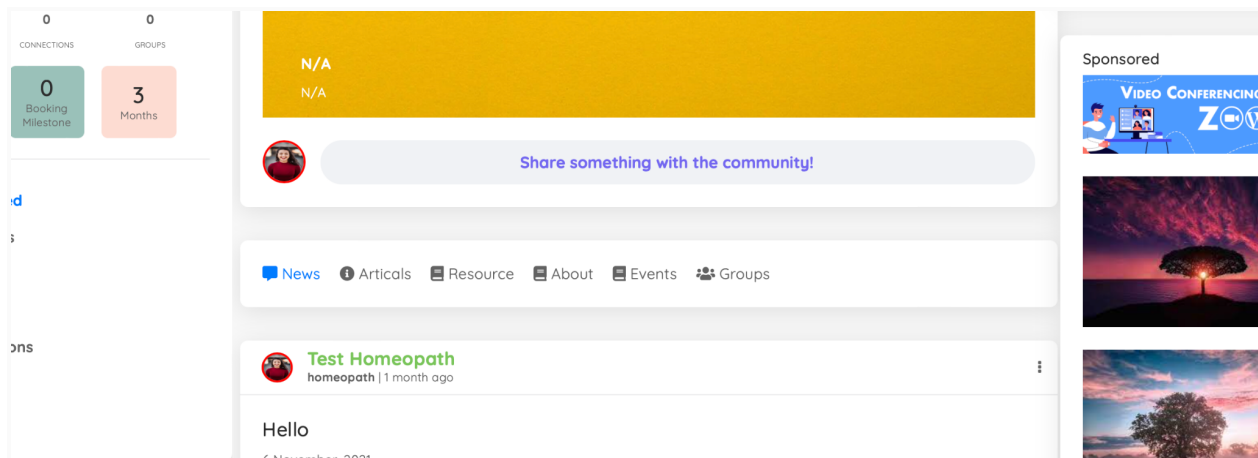

For this step, it's building upon what we have done currently. So improving the ui of the current calendar so I guess it would mostly involve design upgrades.

UI/UX improvement all around as needed with the goal to achieve/create a website at the multi-national standard & quality level within the realm of resources available.

Once we do the small detailed improvements overall, this will create more of a global identity.

Flow improvements, and UX analysis.

For example; when you select 'About' the menu disappears so an improvement would be to keep the "News, Articles, Resources, About, Events Groups" so the user is able to more easily browse without having to go back to the homepage than follow steps to enter the social platform. Essentially, this step is to improve the website like the example above.

Overall, this add on is the continuation of the current phase but to further improve it even more. He is looking to hire us again to build many more features like a research portal, app, etc.

Thank you team.
